EARL J. SMALL ORCHIDS

ST. PETERSBURG, FLORIDA

The above photograph should give you a good illustration of our fine growing control here in Florida. It represents around five thousand mature plants which were raised in our ranges. We have recently constructed two new greenhouses, making a total of seven, in which, in our opinion, we produce the finest in orchid plants and bloom.

When purchasing plants from us you are assured of the same fine quality that you see above. I take great personal pride in the fact that we have never received a complaint on the quality of plants shipped to a customer.

EARL J. SMALL

SEEDLINGS IN 1 3/4" POTS

Listed below are seedlings in 1 3/4" pots. All of these are large plants for the size pot and are in need of planting directly into 2 1/2" pots when you receive them. They average about five inches high and under ordinary care should flower in about three years.

1 3/4" Size \$1.75 each

2 LC. EMINENCE "Variety Outstanding" X C. AMABILIS

Large well formed flowers carried on a spike bearing three to six blooms was the aim in making this cross. Both parents are very productive and with a minimum of lighting control, season of bloom can be readily delayed until Christmas. These seedlings are rapid growers and should flower at an early age. Color will be a rich lavender with very dark lip.

5 C. BOBBIE JEWELL X C. BLANCHLEY'S ALBA

Both of these parents are very fine specimens of the pure white type. They have a nice touch of yellow in the throat and both texture and size are excellent. Season is expected to be about September and on through into the Winter months.

6 LC. TRIDON X C. ANNIE J. LINES

This is a mating between two very fine flowers. Lc. Tridon is a large flower with very brilliant yellow eyes set in a large dark lip. The other parent, C. Annie J. Lines is known by everyone for its beautiful very dark almost fuchsia — purple flowers. The cross was made in January and season is expected to be mainly Winter but with the possibility of flowering twice a year as both parents usually do. (Limited quantity.)

7 LC. COLEMAN BERWICK (Lc. Hertha X C. Belgica)

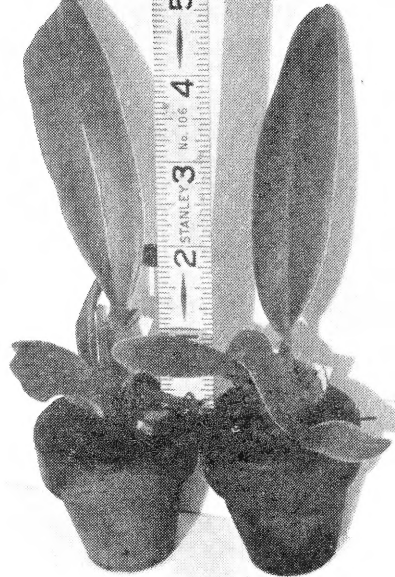

Very fine dark flowers with an excellent shape and texture that greatly resemble Lc. Governor Gore. Season is December and mid-winter. (Limited quantity.)

42 BLC. CALIGULA "Variety Excelsia" X LC. HELEN WILMER

This cross is aimed at producing some of the finest quality exhibition flowers ever raised. BLC Caligula var. Excelsia is very large and extremely well shaped. LC. Helen Wilmer is also large and well shaped but in addition is very dark. Both parents have large beautiful lips and the texture of both is superb. Season is expected to be Winter and Spring. (Limited quantity.)

46 LC. FLORENCE PICKARD X LC. CANTARA ALBA

Two very fine white colored lip parents were used in this attempt to produce a fine new white for the month of September. LC. Cantara is characterized by an extremely large reddish-purple lip while LC. Florence Pickard was selected for its extremely large sized sepals and petals and heavy producing qualities. Both flower in September. (Limited quantity.)

50 LC. TARTAN X BLC. HEATHERWOOD

Exceptionally strong growth and heavy flower production is the goal of this cross. LC. Tartan is a large dark flower with exceptionally strong growth habits. Mating this with BLC. Heatherwood, a very fine shaped, heavy textured, and strong growing plant is sure to produce an abundance of dark fine shaped flowers. Season should be Fall and Winter. (Limited supply.)

191 C. TRIANAE, "Fine Variety" X BC. HARTLAND

The latter parent in this cross is without a doubt the finest dark Brasso-catleya ever raised. The color is so dark it seems almost a shade of red. By breeding this with C. Trianae, it is expected to bring out a very fine new dark Brasso for the Mid-winter Holiday Season. (Limited supply.)

281 LC. LINNAEUS T. SAVAGE X C. GLORIETTE "Variety Superba"

Right from the flask this cross has proven the results of an excellent mating by its unusually strong growth habit. Little needs to be said on behalf of C. Gloriette "Var. Superba" whose flowers are world renown for their beauty, size and shape. Breeding this with the fine LC. Linnaeus T. Savage will produce a fine new hybrid of extremely rich colors for the Winter Season.

295 LC. ALTEN X C. TITRIANAE "Very Fine Variety"

Another bid for large well shaped flowers in Mid-winter. LC. Alten is one of our finest Winter producers of large heavy textured flowers. By mating it with this particular C. Titrianae we expect an even better new Winter flowering hybrid. (If such a thing is possible.)

435 C. MAGGIE RAPHAEL (C. Trianae "Baldwin Hybrid Strain" X C. Dowiana Aurea)

A remake of an old timer using two of the finest parents available. Not much needs to be said for this fine producer of dark orchids in the late Fall and Winter, as it always does its part in filling Christmas orders for hybrid orchids.

436 C. ENID X LC. ALBERT COSTA

Very few hybrids bloom during the late Winter months of February and March, but this is an attempt to bridge that gap. The flowers should be large and full, with very beautiful marked lips. (Limited quantity.)

440 C. EDITHAE X LC. RAPHAELCITA

Very unusual colors will result in mating the pure white C. Edithae with the bronze colors of Lc. Raphaelcita. We offer this to the collector who wishes something different. (Limited quantity.)

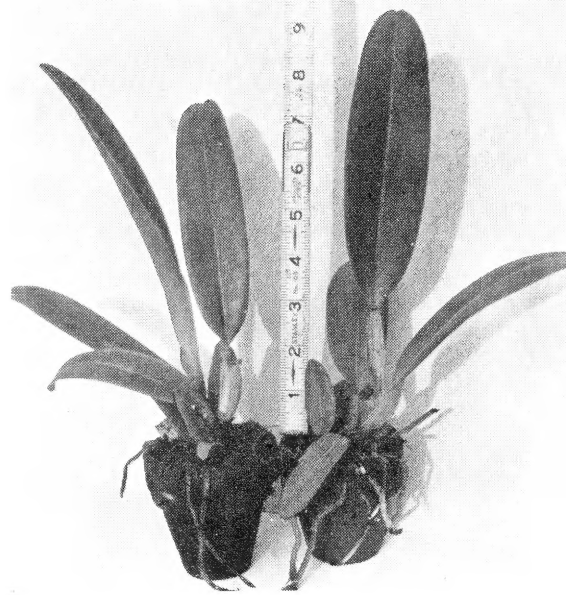

449 C. ARDMORE X C. GIGAS

Vigor, high production, dependability and Season are all rolled into each one of these seedlings. Plenty of good flowers during May and June is the result of breeding these parents. This is a repeat of an earlier identical cross which has proven all the above to be facts, and not just hopes.

SEEDLINGS IN 2½" POTS

Below are listed what we consider the best offer in our catalog. These seedlings are large plants averaging 8" to 10" in height and are ready for you to pot immediately into 3½" or 4" pots. This size plant would be expected to flower under normal care in less than two years.

2½" Size \$3.50

2 LC. EMINENCE "Variety Outstanding" X C. AMABILIS

Large well formed flowers carried on a spike bearing 3 to 6 blooms was the aim in making this cross. Both parents are very productive and with a minimum of lighting control, season of bloom can be readily delayed until Christmas. These seedlings are rapid growers and should flower at an early age. Color will be a rich lavender with very dark lip.

163 C. FABIA X LC. MAX J. PALM

Both of these parents were exceptional flowers of large size and fine dark color. The combination should produce the kind of large dark bloom that are always in demand. (Limited quantity.)

167 C. HARBINGER (C. Enid X C. Titus)

A fine dark hybrid. A profusion of fine dark flowers during the winter season will be the result of this cross. Growth is exceptional.

171 C. TRIUMPH X LC. JACQUINETTA

These plants are expected to be a heavy producer, and may be expected to flower on each new growth as it is developed. The color should be a fine dark. (Limited quantity.)

358 CATTLEYA GLORINETTE X CATTLEYA ENID

This should indeed make a very fine hybrid. C. Gloriette is a very fine large flower with a wide dark lip, and is the parent of many fine hybrids. The season should be winter and variable, possibly blooming with each new growth. These seedlings are very vigorous growers and should flower when quite young.

433 C. MAGGIE RAPHAEL X C. RAPHAELEDA

This cross is a sure thing for the Christmas holiday season. C. Raphaeleda always flowers at this time with very large well formed dark bloom. The colors will be very rich and dark with an almost maroon lip. (Limited quantity.)

434 C. MAGGIE RAPHAEL (C. Trianae ("Fine Variety") X C. Aurea)

The flowers of this old dependable hybrid always speak for themselves. Color is very dark and beautiful. Season is Mid-winter, and they always do their part in filling orders for hybrid orchids at Christmas.

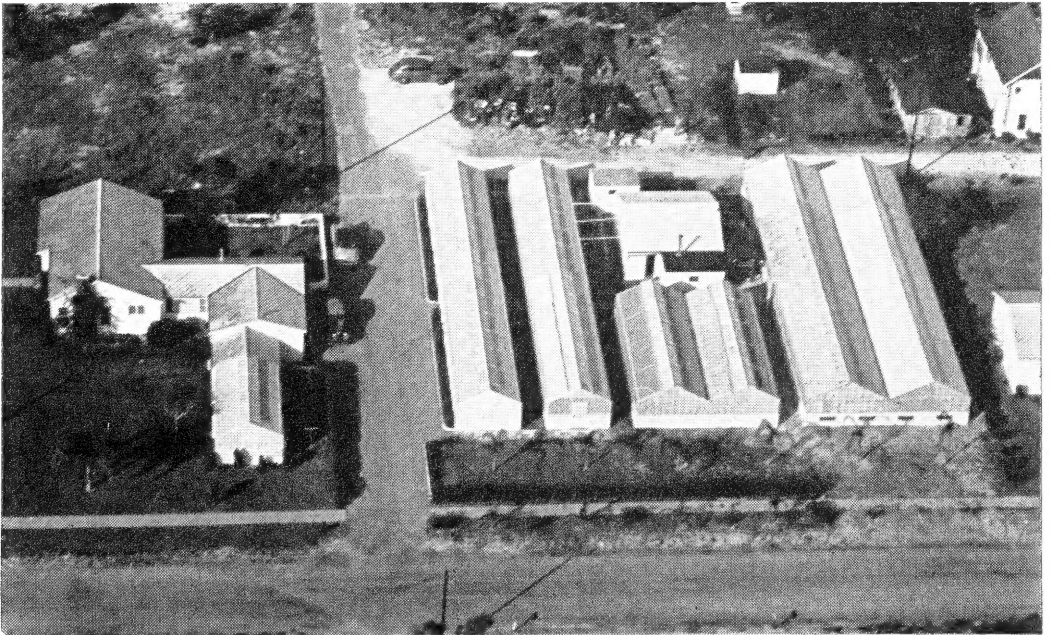

- 543 CATTLEYA ALICE PEARCE (C. Mossiae "Reineckiana" (Young's Var.) X C. Princess Royal Alba)
Pure white sepals and petals with good colored lip are produced by these seedlings. Season is March through May. (Limited quantity.)
- 545 CATTLEYA ALESIA ALBA (C. Mossiae "Reineckiana" (Young's Var.) X C. Dionysious Alba)
Another bid for the spring blooming white with colored lip. This should bloom a little later than the one just above, and hit May and June. These plants are very strong growers. (Limited quantity.)
- 551 CATTLEYA CATHERINE PATTERSON (C. Enid Alba (XXXX Best) X C. Mrs. Frederick Knollys Alba)
Both parents are extremely large white flowers with very fine colored lips, and season is assured to be winter and early spring. The scarcity of good white colored lip in this period makes this a very valuable hybrid in any collection.
- 554 LC. AMERICAN SECURITY (C. Royana X Lc. Princess Margaret)
C. Royana is an exceptionally strong growing Cattleya of large size. Its color is very dark with excellent dark lip and a nice suffusion of yellow. A union with Lc Princess Margaret should make a great hybrid for the months of May, June and July.
- 565 CATTLEYA ENID ALBA (C. Mossiae "Reineckiana" Young's Var. X C. Gigas "F.M.B.")
Large white flowers with beautifully marked colored lips are produced right in the middle of winter by this dependable hybrid. Growth is exceptional and mature plants branch out rapidly to produce large Multi-lead plants. The few plants of this cross that have flowered as of this writing have more than justified our high esteem of these seedlings.
- 566 LC. BOU PHILIPPO (Lc. Windermere X C. Mossiac "R. E. Patterson")
Another old dependable hybrid remade. This cross always flowers in the spring when flowers are in the greatest demand. It is a free grower and a very good producer of bloom.
- 571 LC. CAROL CHANNING (Lc. Derryname "Var. Henrietta Patterson" X C. Royana "Extra Fine")
Mating of these two parents will produce one of the best new hybrids to be found anywhere. Color will be dark and very exquisite. (Limited quantity.)
- 575 LC. ERNIE PYLE (Lc. Altesse X C. Mossiae "R. E. Patterson")
Winter and spring flowers in quantity as well as quality. These seedlings are very strong growers and should flower very young if an earlier batch of this same identical cross is any guide. One plant bloomed just three years and four months from seed. Color is dark.

577 LC. GEORGE E. BALDWIN (C. Enid "Var. Orchidhaven" X Lc. Princess Margaret)

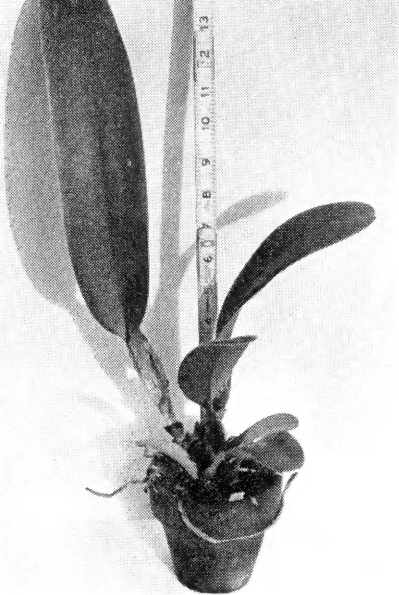

One of the finest hybrids ever raised. A very free producer of large well shaped bloom. Here in Florida this hybrid flowers nearly all the year round, but is predominately a late spring bloomer, with a big share of its bloom in May and June and a secondary crop in September. These are very vigorous seedlings. (Limited quantity.)

We can offer all of the above plants after they are shifted and well established in 3½" pots at \$6.00 each for the customer who desires fine strong growing seedlings that are not in need of immediate transplanting.

The seedlings in this catalog are only a partial list of the many new hybrids we are raising in our seedling range. Although we do not have sufficient plants of our other seedlings to warrant listing, we will be very glad to fill orders for additional crosses. To do this we ask that you give us an idea of the Season and color you prefer, and let us make the selection. Our reputation is your guarantee of satisfaction.

Aerial view of our Seedling Range

SEEDLINGS IN 3 1/2" POTS

These are very large, nearly mature seedlings ready for 5" pots as soon as you get them. They should not be confused with plants we previously offered in 3 1/2" pots as these are much larger and many will flower within a year under normal conditions.

3 1/2" Size \$10.00 each

358 C. GLORINETTE X C. ENID

This should indeed make a very fine hybrid. C. Gloriette is a very fine large flower with a wide dark lip, and is the parent of many fine hybrids. The season should be winter and variable, possibly blooming with each new growth. These seedlings are very vigorous growers and should flower when quite young.

545 CATTLEYA ALESIA ALBA (C. Mossiae "Reineckiana" (Young's Var.) X C. Dionysious Alba)

Another bid for the spring blooming white with colored lip. This should bloom about May and June. These plants are very strong growers.

551 C. CATHERINE PATTERSON (C. Enid Alba (XXXX) Best X C. Mrs. Frederick Knollys Alba)

Both parents are extremely large white flowers with very fine colored lips, and season is assured to be winter and early spring. The scarcity of good white colored lip in this period makes this a very valuable hybrid in any collection.

554 LC. AMERICAN SECURITY (C. Royana X Lc. Princess Margaret)

C. Royana is an exceptionally strong growing Cattleya of large size. Its color is very dark with excellent dark lip and a nice suffusion of yellow. A union with Lc Princess Margaret should make a great hybrid for the months of May, June and July.

558 CATTLEYA BING CROSBY (C. Royana X C. R. Cadwalader)

June, the month of weddings and graduations is hit squarely by this fine dark hybrid. The strong growing habit of this plant makes it a favorite among orchid growers everywhere. Color is extremely dark, and the lips of some are marked with brilliant yellow.

565 CATTLEYA ENID ALBA (C Mossiae "Reineckiana" Young's Var. X C. Gigas "F.M.B.")

Large white flowers with beautifully marked colored lips are produced right in the middle of winter by this dependable hybrid. Growth is exceptional and mature plants branch out rapidly to produce large Multi-lead plants. The few plants of this cross that have flowered as of this writing have more than justified our high esteem of these seedlings.

575 LC. ERNIE PYLE (Lc. Altesse X C. Mossiae "R. E. Patterson")

Winter and spring flowers in quantity as well as quality. These seedlings are very strong growers, and should flower very young if an earlier batch of this same identical cross is any guide. One plant bloomed just three years and four months from seed.

LARGE HYBRID SEEDLINGS TO FLOWER ON THE NEXT GROWTH.

We have many fine new Hybrids to offer that are bearing their first sheath now or will do so on the next growth. We are listing a few below and ask that you write for a more complete list if interested in large unflowered Hybrids.

4½" to 5½" Pots \$12.50 each

C. ENID ALBA

Large white flowers with beautiful colored lip are produced right in the middle of Winter by this dependable hybrid. Growth is exceptional and mature plants branch out rapidly to produce large multi-lead plants.

C. BING CROSBY

June, the month of graduations and weddings is hit squarely by this fine among orchid growers everywhere. Color is very dark, and the lips of some are marked with brilliant yellow.

C. CATHERINE PATTERSON

Flowers from Christmas to Easter are produced by this hardy growing new hybrid. The flowers are large size, white sepals and petals with a very fine colored lip.

MATURE PLANTS

LC. GEORGE E. BALDWIN (C. Enid X LC. Princess Margaret)

One of the finest hybrids ever raised. A very free producer of large well shaped bloom. Here in Florida this hybrid flowers nearly all the year round, but is predominately a late Spring bloomer, with a big share of its bloom in May and June and a secondary crop in September. Full size mature plants in 5" to 7" pots at \$15.00 to \$25.00 each.

LC. ETHEL MERMAN (LC. Jane Dane X LC. Canhamiana Alba)

A large free blooming white flower with purple lip. This hybrid starts flowering in February and continues until May covering both Easter and Mother's Day periods with plenty of flowers. Mature plants in 5" to 7" pots \$12.00 to \$18.00 each.

LAELIOCATTLEYA TIBERTA (Lc. Ibbie X C. Bertii)

A very fine hybrid of the medium size, but one which blooms very prolificly in the Fall and Winter seasons. It is not at all unusual to have 7 to 9 bloom per spike. These are all very large plants measuring 18 to 30 inches in height. 6" to 8" pots at \$10.00 to \$15.00 per plant.

LAELIOCATTLEYA VANDELETTA (Lc. Ibbie X C. Leda)

Another very fine hybrid that is almost identical to Lc. Tiberta above in every respect, but usually has bloom that are a little darker in color. Some of these are quite dark. These plants are also very large like the above. 6" to 8" pots at \$10.00 to \$15.00 per plant.

C. ST. PETERSBURG (C. Clementine Goldfarb X C. Eucharis)

This is a very fine free blooming pure white of medium size and knows no season. They bloom two to three times a year as each new growth is formed. It was originally named in April 1949, by H. Patterson & Sons, to honor St. Petersburg's first orchid show, but was later registered as C. Clarice by another firm.

Mature plants 5" - 6" pots \$20.00 to \$30.00

LC. WALTER WINCHELL (C. Tappan X Lc. Dupresan)

A very fine and richly colored dark flower that blooms in Fall and Winter. Plants are exceptionally strong growers.

Mature plants 5" - 6" pots \$20.00 to \$30.00

478 C. ENID X LC. PRINCESS MARGARET

This parentage is registered as the famous Lc. George E. Baldwin, but we prefer to list it as an unnamed hybrid. This batch has produced us some very magnificent flowers, but they do not bear the characteristics of its namesake. They actually more resemble the Lc. Governor Gore type of flower. All have very richly colored petals sometimes splashed deeper at the tips, and bear a lip with rich velvety maroon and purple shades. It flowers very freely and seems to be a predominately Winter bloomer.

Mature plants 5" - 7" pots \$10.00 - \$20.00

C. FLORENCE PATTERSON (C. Clementine Goldfarb X C. Eucharis)

A very strong growing and free blooming pure white that flowers several times a year on each new growth just as soon as it is produced. Flowers are of excellent substance.

Mature plants 5" to 6" Pots \$20.00 to \$30.00.

LC. MARY MARTIN (C. Hardyana Alba X Lc. Jane Dane)

This cross is a very heavy producer of white flowers with a very rich colored lip. Here in Florida this fine hybrid produces nearly all its flowers in the month of June when they are in demand for weddings.

Mature plants 5" to 7" Pots \$10.00 to \$15.00 each.

C. OLD FORESTER (C. Enid X C. Charybdis)

This magnificent hybrid should be in every collection. Its flowers are extremely large with wide sepals and petals, and are very rich lavender with a velvety deep purple lip. These plants are very large and strong growers. (Only a limited number of plants are available.)

5" to 7" Pots \$25.00 to \$35.00.

LC. LOUELLA PARSONS (Lc. Jane Dane X C. Gigas "F.M.B.")

A very remarkable free flowering white with colored lip. The bloom are quite large and have paper white sepals and petals. Here in Florida we get nearly the entire crop of bloom during the wedding month of June.

Large mature plants in 5" to 7" Pots at \$15.00 to \$25.00 each.

LC. ALTEN (Lc. Altesse X C. Enid)

This is one hybrid we should never offer for sale due to its high quality and productivity but we list it here to provide a more complete catalog. The flowers are extremely large in size and very beautifully colored, with rich lavender petals and very frilly dark lip usually beautifully marked with Yellow. Texture is excellent and Season is Winter and variable.

Mature plants 5" to 7" Pots \$25.00 to \$40.00 each.

LC. CAMHAMIANA ALBA (L. Purpurata, Variety "Orchidknoll" X C Mossiae, "Reineckiana" Young's Variety)

This is an identical repeat cross of Albert's famous No. 100 strain. The flowers have large white sepals and petals and a deep rich purple lip. Productivity is high with three to six bloom per stem and Season is May and June. Growth is very exceptionally strong. 5" to 7" Pots \$15.00 to \$25.00.

C. MOSSIAE (Species from Venezuela)

We offer this old dependable Cattleya for those who wish flowers during Spring when both Easter and Mother's Day create a good demand. C. Mossiae is one of the easiest to grow and flower and is especially recommended for the beginner.

5" to 6" Pots \$7.50 to \$10.00

PHALAENOPSIS SEEDLINGS IN COMMUNITY POTS

The following crosses of Phalaenopsis seedlings are offered for a limited time only. They are crowded in 3" pots and contain approximately 20 good seedlings that can easily flower in 18 months or less. Per pot \$7.50 each.

73 P. KATHERINE SIEGWART "var. Helvetia" X P. AVELINE "var. White Swan"

This particular Katherine Siegwart has very exceptionally large pure white flowers (measuring up to 5" across). Their texture is extremely heavy and the keeping quality is excellent. The flowers last for months on the plant and they may be shipped almost anywhere with the assurance of safe arrival. P. Aveline "var. White Swan" is similar in many respects, so this mating cannot fail to produce an excellent strain of White Phalaenopsis.

72 P. KATHERINE SIEGWART "var. Helvetia" X P. ALTADENA "var. Pearl"

P. Altadena var. Pearl has won first prizes in both Miami and St. Petersburg orchid shows for its beautiful faintly blushed pink blossoms with heavy textured, overlapping sepals and petals. This union with the above described P. Katherine Siegwart assures us we can expect some very beautiful results from these plants.

70 P. KATHERINE SIEGWART "var. Helvetia" X (P. DORIS X P. VENUSTUS)

Mating these two very large, pure white Phalaenopsis will produce some very outstanding and large sized "Moth Orchids". The latter plant is exceptionally large and well shaped, paper white and perfect in every respect. (Only a limited number of these community pots are available.)

SPRAY TYPE ORCHIDS

J-7 VANDA SUAVIS "Var. Broadview" X V. TRICOLOR

Very vigorous seedlings that should produce quantities of very pretty and fascinating bloom in a range of bronze to spotted light lavender colors.

Large plants in 2½" pots, \$3.50 each.

Large plants in 3" pots, \$5.00 each.

240 VANDA ROSE MARIE X V. TERES "Var. Alexanderii"

Strong and sturdy growing seedlings in 2" pots that should bloom in less than two years at their present growth. Needs to be grown out doors in full sunlight in Summer to flower.

Plants 6" - 8" high, \$1.00

Plants 12" - 14" high, \$2.00.

279 VANDA PRINZES BEATRIX (V. Coerulia X V. Agnes Joachim)

A semi-terete type of Vanda that will thrive in a well lighted greenhouse or out of doors in warm weather. Color should range from lavender into shades of blue. (Limited quantity.)

2½" pots, \$3.50.

476 DENDROBIUM PHALAENOPSIS "Schroederianum" (Dixon Strain)

These are undoubtedly some of the darkest D. Phalaenopsis ever raised. Only the famous D. Louis Bleriot can exceed their deep color. Very full and compact bloom of good large size.

Blooming size plants 3½" to 4" pots, \$7.50

Very large plants, \$15.00

193 DENDROBIUM THWAITESAE "Veitch's Variety" X D. AINSWORTHII

Mating the beautiful yellow D. Thwaitesae with the cream D. Ainsworthii should produce many beautiful shades of yellow spray orchids in the spring. 1¾" size \$1.50 each.

312 DENDROBIUM PHALAENOPSIS "Schroederianum"

The ever popular "cane orchid" with beautiful sprays of lavender bloom. Very easy to grow. 1¾" pots \$1.50 each.

COLLECTIONS OF ORCHID PLANTS

To acquaint new customers with the size and quality of our plants, we offer the three collections below at reduced prices. Because of extreme values involved, no changes can be made and varieties are to be selected by us.

\$25.00 BEGINNER'S COLLECTION

1	Mature blooming size Cattleya plant	\$12.50
1	Hybrid seedling in 3½" pot	10.00
3	Hybrid seedlings in 2½" pots	10.50
3	Hybrid seedlings in 1¾" pots	5.25
<hr/>		
8	Plants	Catalog value \$38.25

\$50.00 AMATEUR'S COLLECTION

3	Mature blooming size Cattleya plants in variety	\$37.50
2	Hybrid seedlings in 3½" pots	20.00
3	Hybrid seedlings in 2½" pots	10.50
4	Hybrid seedlings in 1¾" pots	7.00
<hr/>		
12	Plants	Catalog value \$75.00

\$100.00 CONNOISSEUR'S COLLECTION

1	Pure white Hybrid (mature plant)	\$ 20.00
1	White colored lip Hybrid (mature plant)	17.50
1	Fine colored Hybrid (mature plant)	17.50
3	Hybrid seedlings to flower on next growth	37.50
6	Hybrid seedlings in 2½" pots	21.00
6	Hybrid seedlings in 1¾" pots	10.50
1	Community pot Cattleya seedlings	10.00
1	Community pot Phalaenopsis seedlings	7.50
<hr/>		
20	Plants	Catalog value \$141.50

(ONLY ONE OF ABOVE COLLECTIONS TO A PERSON)

Note: Seedlings in all the above collections will be assorted high quality plants (no two alike) and will contain approximately 40% white ones in each group.

CONDITIONS OF SALE

1. Orders will be filled in the order that they are received.
2. We do not make a packing charge, but cannot accept orders for shipment of less than \$5.00.
3. All orders are F.O.B. St. Petersburg and unless otherwise advised, shipment will be made via Railway Express, Collect. However for faster service to distant points and in cold weather we recommend Air Express (or Air Freight on large orders). All shipments to Hawaii are made via Air Mail Parcel Post. In order to save time to this area, our firm will advance the necessary postage, but in return ask that you remit the cost promptly upon receipt of bill for same.
4. Our firm has been properly authorized to handle shipments to Hawaii, but first the customer must forward with his order his permit which he must obtain from the Board of Commissioners of Agriculture and Forestry, Honolulu.
5. Unless your credit has been established with us, kindly enclose check, Money order or bank draft to cover payment of your order in full.
6. We prefer to ship all large plants and larger seedlings out of pots to lower the cost of shipping, particularly when the distance is great. Unless requested to ship plants in pots, all large plants will be carefully removed and packed for guaranteed safe arrival in lightweight cardboard shipping containers.
7. We are prepared to make shipments the year around in all types of weather. We have a special type of padded insulated wrapper for use in Winter where shipments must go into cold climates. In addition to this, we check weather reports and do not ship when extremely bad weather conditions exist at the destination.
8. Seedlings designated in this catalog as "Limited Quantity" are offered subject to prior sale and we reserve the right to substitute a similar cross of equal or better value unless a second choice is given or you specify "No Substitutions".
